

## SHARE Best Practices

- The purpose of SHARE is the collection and proper storage of unopened, pre-packaged individually wrapped food items, including milk, juice or produce from GCS meals that cannot be returned to the school kitchen. This includes items from all meal and food service programs such as Breakfast In the Classroom, Fresh Fruit and Vegetable, etc. These items can then be made available to any student within the school any time during the school day
- The school contact person is responsible for maintaining and cleaning out the refrigerator on a weekly or as needed basis. This task is perfect for a school's environmental club, 4-H chapter, student government, etc.
- The refrigerator will be labeled and is used for the SHARE program only. (I will bring stickers to your school very soon.)
- **IMPORTANT:** The SHARE program contains perishable food items that may require refrigeration to prevent spoilage.
- Thermometer for the refrigerator is recommended.
- Pay attention to dates on packaging. Consider emptying the fridge on a regular schedule to keep fresh items rotating through, thereby making the contents more attractive to students who are looking for a snack.
- If you have questions or would like further clarification, please do not hesitate to reach out. Our contact information is listed below:
